

Incogni vs Pentester.com

Which Privacy Protection Tool is Right for You?

A Friendly Comparison for Small Business Owners, High-Net-Worth Individuals & Solo Consultants

Questions? Reach out to bill@thetechcoaches.com

WHY THIS MATTERS

Your Digital Footprint is Bigger Than You Think

420+ Data Brokers are actively collecting, aggregating, and selling your personal information right now.

Prime Targets: Small business owners, executives, and consultants are high-value targets for identity theft.

Data = Money: Your personal data is a commodity sold to marketers and potentially cybercriminals.

High Cost of Breaches: One data breach can cost thousands in recovery time, legal fees, and reputation damage.

WHAT'S THE DIFFERENCE?

Two Different Approaches to Protecting Your Privacy

Incogni

Focuses on removing your personal information from data broker databases to stop spam and reduce exposure.

FOCUS: PRIVACY PROTECTION

Pentester.com

Focuses on scanning your website and digital assets to find security vulnerabilities before hackers do.

FOCUS: SECURITY SCANNING

💡 Key Insight: They solve different problems — think of it as Privacy vs. Security.

THE DATA PRIVACY EXPERT
